

Successful Supervision

Winter 2016

Your front line supervisors are the pivotal people to ensure that your employees live the Core Values. When they know how to serve as performance coaches, supervisors help employees be successful. Retaining great employees becomes much easier because team members feel valued, supported and challenged in their work.

If you want to begin the shift to performance coaching, you need to provide your supervisors with the right tools. Cargas suggests the popular **Successful Supervision** course. Three biweekly four-hour classes provide a solid foundation in performance management and coaching. The interactive model of training emphasizes participation, specific skill building, and practical application back on the job. The instructor for the course is consultant TJ Titcomb, PhD SPHR.
