# Greenshades Software's **Payroll HCM** provides a unified platform that harmonizes the employee lifecycle with Payroll

For more than 15 years, Greenshades Software has been the trusted source for payroll tax-filing, year-end forms, employee self-service, ACA management and other solutions designed and created to take the hassle out of in-house payroll. Now, Greenshades Software's efficiency and compliance products are available in an all-in-one solution, complete with payroll, serving as a single source for employee data and related processing.

Save time on traditionally tedious processes

Greenshades Software's wizard-driven set-up and processing not only take the guess work out of the equation, it also eliminates the need for redundant actions or double entry. As a result, clients save time and resources that can be spent on other areas of their businesses.

Employee access anywhere, anytime

Help employees make educated decisions by offering easy access to pay history, benefits information, W-2's and more. Empower employees to be in control of their information as well as have the ability to easily request time off, submit address changes, change withholding allowances or make other requests that would otherwise need to be managed on paper. All the information they need, from current and previous pay documents to company specific documents like the employee handbook, are available at their fingertips.

Coordinate efforts into a single all-in-one solution

By creating an all-in-one solution for HR and Payroll functions, Greenshades Software has taken previously scattered processes and information and unified them into a single, easy to use, fully integrated platform.

Employers create the experience

Keep frustration at bay with a platform that fits your specific business needs with custom workflows and the tools to suit every employee type, department, location and administrative user. These processes are designed to be flexible and work to the needs of the business.
