

# 7 Ways Distributors DRIVE PROFITS with Rockton Pricing Management

The most flexible multi-platform, multi-currency pricing solution ever, RPM helps distributors, wholesalers and suppliers manage complex pricing problems with ease.

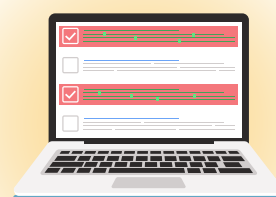

## 1 Protect Margins with Automated Dynamic Pricing

Set up any pricing scenario once and RPM will do all the calculations and hard work for you behind the scenes. No need to set “Price Levels” for every item or customer.

## 2 Save Time with Simplified Price Lists

Quickly navigate multiple price lists. The intuitive interface lets you create, organize, filter and search multiple price lists super fast.

## 3 Reduce Waste with Date-driven Pricing

Create multiple price lists with valid date ranges to automatically apply the right one—without waiting until midnight on Saturday to push out price changes.

## 4 Automate tracking of Rebates, Commissions, Offsets and Other Adjustments

RPM takes the backoffice pain out of flexible pricing. Track special pricing adjustments, handle complicated commissions, manage royalties and much more.

## 5 Stay Agile with Cataloging

Maintain customer-specific price books or catalogs online for fast and easy look up of any item—whenever, wherever it’s needed.

## 6 Empower Your Sales Team with Information

Give your sales team the information they need to close deals quickly. Simplify the pricing experience so they can quote the accurate price for any item, any where, any time.

## 7 Consolidate with ERP integration

Through SQL-based and web service APIs, RPM can connect to any ERP system to simplify financial management, reduce errors and centralize business data.

### Rockton Pricing Management puts pricing in the fast lane

The most flexible multi-platform, multi-currency pricing solution ever available. We’ve designed RPM based on 20 years of Rockton innovation and expertise to make pricing SIMPLER, EASIER and FASTER.
